Research Methods in Political Science

Goal of the course

Why do we call our discipline "political science"? What kinds of research do political scientists do, and how do they communicate that knowledge to one another? How do we know what we think we know? How do we measure political phenomena? How would we know if a new public policy "worked"? How do we analyze data, and what are good data to analyze? Are ethics as hard to define in "political science" as they are in "politics"?

During the course of the semester, we will discuss these issues and others. Our discussions, the readings, various assignments, the midterm and final exams, and the research paper will facilitate your becoming intelligent consumers of political science research, as well as help you become producers of your own research. The skills that you develop in the course will help you understand the literature that you read in substantive courses, help you distinguish between real research and meaningless rubbish, enable you to better understand the assumptions behind each research design, introduce you to data management using a popular statistical package, help you find published research and data archives on topics that interest you, and familiarize you with some of the techniques used in individual and aggregate level analysis.

For many students, this will be an entirely different kind of course. Many good undergraduate courses require you to become knowledgeable about a field, such as Comparative Politics, Political Behavior, Public Policy, American Politics, or International Relations. In this course, we are not focused on a particular field, but are more interested in understanding the methods that political scientists in all fields use to understand and build knowledge. Of course, new things can be both exciting and frightening. Any trepidation that you may have is best overcome by "feeling the fear, and doing it anyway." The excitement will come with the realization that this knowledge is empowering, in that it will enable you to find, read, and understand research on your own. You will also begin to produce this kind of research, which will give you a product of your own labors.

Requirements

In order to meet these goals, participants in the seminar will be required to

- **Attend and participate (5%)**. Every person should come to class prepared to comment on the assigned readings, and help others to understand the concepts presented in the readings and assignments. Research is not a spectator sport, so you should expect me to ask for your contributions on a regular basis. Some time in class will be devoted to lecture, but your participation in this course is expected to be that of an "active learner". Multiple absences seriously jeopardize the prospect for successful completion of the course.

- **Write occasional assignments (25% cumulative)**. Some assignments are short essays, and others are exercises using data. All completed assignments must represent each participant's own and sole work, unless otherwise directed. Some assignments will be submitted hardcopy in class, but most will be submitted online via E-Learning.

- **Complete a Midterm Examination (20%)**, tentatively, October 14

- **Complete a Final Examination (25%)**. Thursday, December 18, 3:00 to 5:00 pm

- **Write a Research Paper (25%)**. Each participant will be required to submit a research paper. Papers will be judged on readability, the appropriateness of the research question, the suitability of the design for that question, the interpretation of the analysis, and (if appropriate) the feasibility of extending the analysis in an Honors Thesis. Guidelines for the paper are posted here. Due December 11.

Rhythm

Our normal rhythm will be to begin discussion of the weekly reading assignments on Tuesday, and wrap up that discussion on Thursday. Following a break on Thursday, we will usually have some time to explore applications in SPSS, the data analysis system that we will be using during the course of the semester. Any written assignments following up on those discussions will be due on the following Tuesday. Our normal rhythm will be disrupted by the American Political Science Association meetings (August 27), the midterm exam, and Thanksgiving.

Readings and Resources

- Johnson, Janet Buttolph and H. T. Reynolds. 2012. *Political Science Research*

- Kirkpatrick, Lee A. and Quentin Kidd. 2013. A Simple Guide to SPSS® for 978-1-
  11135-379-7

Political Science. Wadsworth Cengage. ISBN

- You will also be required to access numerous journal articles, which are generally available electronically through access to E-Learning. There will also be a coursepack available with the same readings available at Target Copy.

- You will also learn some basic data analysis using SPSS. Students should load this program onto a laptop or tablet (with wireless capability) that they can bring to class when announced. SPSS is available
  - in the UF Apps package (free, and can be used on a Windows, Mac, or tablet, but can be slow)
  - for lease (to November 30 plus 60 day grace period) from UF Software Services for use on your laptop or home computer ($35 plus tax)
  - for six-month lease from Onthehub for use on your laptop or home computer ($38 + $4.99 download fee)
  - in the Academic Technology Labs around campus (free, but you will also need a version on your laptop or tablet that you can bring to class).

- E-Learning - I will also post some materials, assignments, assignment inboxes, and grades on the class E-Learning - Canvas site. Log in at http://lss.at.ufl.edu

- listserv - Registered students in the class are enrolled on the class listserv. Messages from the listserv are sent to students’ Gatorlink email addresses (eg., youhoo@ufl.edu), and students should check that email regularly.

The following is a tentative calendar, and dates on assignments are especially subject to revision. Readings marked with an asterisk (*) are included in the Target Copy coursepack and on E-Learning (under Files).

| August 26 | Introduction to the course: What kinds of research do political scientists do? How do they present their work? |
| August 30 | No class: American Political Science Association meetings |
| Sept 2-4 | Anatomy of a Research Article |

Read: Johnson and Reynolds, Chapters 1 and 2

Bound copies of most journals should be available in Library West.

On Tuesday, Sept 2, be prepared to discuss:

(1) Describe Hall's article, outlining its component parts. What is Hall's main "theory"? Does she have a "theory", in the sense that term is used by Johnson and Reynolds (Chapter 2)?

(2) What are Hall's hypotheses? How does she test them?

On Thursday, Sept 4, be prepared to discuss:

(3) If Most were advising Hall on where to go next in her research on electoral motivations for judicial behavior, what directions would be scientifically fruitful?

On Thursday, Sept 4, have SPSS loaded onto your laptop or tablet ready to use, and bring it to class.
Read: Johnson and Reynolds, Chapter 3

**Followup Assignment Due (Sept 16; 5%)** - Write a short literature review that reviews one of the following optional journal articles, at least one journal article which was cited by the selected article, and at least one journal article that cited the selected article. Your review should explain whether the ideas and methods represented in the three (or more) articles are cumulative, and if so, how the ideas (or methods) from later articles were developed from ideas in earlier articles. Your review should close with your thoughts on avenues for future research in the subfield. I expect good papers will be five to seven pages.

Optional journal articles:

---

Read: Johnson and Reynolds, Chapter 4

Kirkpatrick and Kidd, Chapter 3.

**Be prepared to discuss:** What are the characteristics of good hypotheses? What is Halls's (1993) unit of analysis?

**Followup Assignment Due (Sept 23; 4%)** - Find an existing dataset somewhere

- in the ICPSR archive (www.icpsr.umich.edu)
- American National Election Study (www.electionstudies.org)
- Quality of Government Institute data (http://www.qog.pol.gu.se/)
- or a publicly available dataset you have found in the readings

Propose two hypotheses that you could test with that dataset. For each hypothesis, tell me

1. The dataset that you are proposing to use
2. The unit of analysis
3. The independent variable(s)
4. The dependent variable(s)

---

Read: Johnson and Reynolds, Chapter 5

Kirkpatrick and Kidd, Chapter 4.

**Be prepared to discuss:** What are the principal desirable characteristics of social science measures? What is the difference between those characteristics? What measurement issues are important in developing good measures of political knowledge and liberal democracy? Do Hall’s measures have desirable characteristics? How do you know, or how could you know?

**Followup Assignment Due (Sept 30; 3%)** - For each of the following variables in the designated datasets, (1) identify the unit of analysis and (2) present appropriate univariate statistics (either frequencies or descriptives) to describe the univariate distribution.
Read: Johnson and Reynolds, Chapter 6 (pp. 165 - 193)

September 30 - Oct 2

Kirkpatrick and Kidd, Chapter 5.

Be prepared to discuss: What are the essential characteristics of an experiment, and what are the basic strengths and weaknesses of an experimental research design as compared to non-experimental designs? Evaluate those strengths and weaknesses with respect to the assigned articles. How is the independent variable manipulated, and how is the dependent variable measured? Is Hall (1992) an experiment? Why or why not?

Followup Assignment Due (Oct 7; 3%) - Replicate the King and Matland findings using crosstabs and controlled comparisons in their dataset.

Read: Johnson and Reynolds, Chapter 6 (pp. 194 - 221)

October 7 - 9

Kirkpatrick and Kidd, Chapter 6.

Be prepared to discuss: What are the basic strengths and weaknesses of a quasi-experimental research design and a case-study design as compared to an experimental design? Are Stratmann and Baur (2002) and Drury et al (2005) high in internal validity, external validity, neither, or both?

October 14

Midterm Exam

October 16

Go over Midterm Exam; Discuss Research Paper requirements

Read: Johnson and Reynolds, Chapter 8

Kirkpatrick and Kidd, Chapter 7.

Be prepared to discuss: Are there any advantages or disadvantages to participant observation techniques to gather data? Do these strategies pose any threats to the internal validity of the research design?
### October 21 - 23
**Followup Assignment Due (October 28; 5%) - Observe a public meeting.** This can be any meeting of a legislature, legislative committee, commission, local board, or any other public agency that you have the right to attend by virtue of your citizenship. Examples of acceptable meetings are the Florida House of Representatives, the U.S. House Committee on Energy and Commerce, the Boynton Beach City Commission, or the Alachua County Recreation and Open Space Advisory Committee. You may, but are not required to, observe a public meeting in your hometown. The Sunday *Gainesville Sun* usually lists upcoming public meetings in the City of Gainesville and Alachua County. Examples of unacceptable meetings are Student Government, its committees, other student or UF groups, or neighborhood property owners association meetings.

This website lists public meetings in the City of Gainesville: [http://www.cityofgainesville.org/GOVERNMENT/ClerkOfTheCommission/NoticeofMeetings/tabid/372/Default.aspx](http://www.cityofgainesville.org/GOVERNMENT/ClerkOfTheCommission/NoticeofMeetings/tabid/372/Default.aspx)

This website lists public meetings in Alachua County: [http://meetingdocs.alachuaCounty.us/meetings/](http://meetingdocs.alachuaCounty.us/meetings/)

Write a short essay which (a) describes the setting of the meeting, (b) describes your observation role (using a role as defined by one of the readings), and (c) discusses whether the behavior of the meeting's participants varies by some independent variable or variables (eg.: gender, issue type, time). Does your observation of this case tend to confirm a pre-existing theoretical expectation, infirm a pre-existing theoretical expectation, and/or help build theory by induction?

### October 28 - 30
#### Researchers as Misers: Sampling

**Read:** Johnson and Reynolds, Chapter 7

Kirkpatrick and Kidd, Chapter 8.

**Be prepared to discuss:** When should researchers avoid sampling? Why do researchers have to sample? What kinds of samples are used in the assigned articles for this week? Why were these samples chosen? Were these samples appropriate? For each sample, what is the theoretical population?

### November 4 - 6
#### Researchers as Diggers: Content Analysis and Aggregate Data

**Read:** Johnson and Reynolds, Chapter 9

Kirkpatrick and Kidd, Chapter 9.

**Be prepared to discuss:** What kinds of research designs are employed in this week's readings? Where did the researchers dig up their data, and are the data and measures appropriate for the questions posed in the articles? Are these research stronger in internal validity or external validity, and why?

### November 11 - 13
#### Researchers as Interrogators: Survey Analysis

**Read:** Johnson and Reynolds, Chapter 10

**Be prepared to discuss:** What are the challenges in constructing survey instruments posed by the readings? What strategies do the authors propose to address those challenges? Do these strategies aim to improve validity, reliability,
<table>

</thead>
</table>
| November 18 - 20 | **Researchers as Number Crunchers: First steps in presenting your data!**  
**Assignment Due (November 18; paper submission; 1%)** - Print the survey. (You'll need the Acrobat Reader, if you don't already have it.)  
Pick a person to interview by phone (this can be a sample of convenience), and interview the person using this questionnaire. Record the forced choice responses by circling the number of the response. Record the open-ended responses by filling in the blank, or by verbatim transcript of the respondent's answers. Be sure to record the start time, the end time, and the respondent's first name in the appropriate places on the questionnaire.  
**Read:** Johnson and Reynolds, Chapters 11 and 12  
**Browse:** Introduction to the ICPSR  
**Survey Documentation Online** [http://sda.berkeley.edu:7502/](http://sda.berkeley.edu:7502/).  
**Assignment Due (November 25; 4%)** - Submit a research proposal for your final paper. Your proposal should have an introductory paragraph (or two) stating the research problem that your paper will address, propose at least two hypotheses that will be empirically tested in the paper, identify a dataset that will be used, and identify measures for the independent, dependent, and control variables to be used in the test.  
**November 25** | **Discussion of Research Proposals** |
| November 27 | **Researchers Being Thankful (Thanksgiving Holiday)** |
| December 2 - 4 | **Researchers as Number Crunchers: Multivariate Analysis and Presenting results**  
**Read:** Johnson and Reynolds, Chapters 13 and 14  
**Kirkpatrick and Kidd, Chapters 10-11** |
| December 9 | **Researchers as Demons?: Ethics in Social Scientific Research**  
**Read:** Belmont Report ([http://www.hhs.gov/ohrp/humansubjects/guidance/belmont.html](http://www.hhs.gov/ohrp/humansubjects/guidance/belmont.html)).  
Be prepared to discuss: Did Milgram violate APSA standards of ethics in their research? If so, which ones? If not, should our standards be revised to prohibit that kind of research? (Okay, be normative for once!) Are control groups victimized in experiments that evaluate social programs? Does the wealth of online data pose different kinds of ethical dilemmas for social science researchers?  
**December 11** | **Research Papers Due** |
| December 18, 3:00 pm - 5:00 pm | **Final Exam** |

8/25/2014
Goal of the course

Why do we call our discipline "political science"? What kinds of research do political scientists do, and how do they communicate that knowledge to one another? How do we know what we think we know? How do we measure political phenomena? How would we know if a new public policy "worked"? Why didn't the polls in this year's midterm election call any of the members of this seminar? How do we analyze data, and what are good data to analyze? Are ethics as hard to define for political scientists as they are for political campaigners?

During the course of the semester, we will discuss these issues and others. Our discussions, the readings, various written assignments, computer assignments, the final exam, and the final research paper will facilitate your becoming intelligent consumers of political science research, as well as help you become producers of your own research. The skills that you develop in the course will help you understand the literature that you read in substantive seminars, help you evaluate that research, enable you to better understand the assumptions behind each research design, introduce you to data management using a popular statistical package, help you find published research and data archives on topics that interest you, and familiarize you with some of the techniques used in individual and aggregate level analysis.

My only assumption is that participants in the seminar are intelligent, motivated students beginning a Ph.D. program or an M.A. program (Public Affairs, Political Campaigning, or International Relations). For many students, this will be an entirely different kind of course. Many good undergraduate lecture courses and graduate seminars require you to become knowledgeable about a field, such as Political Behavior, Public Policy, or International Relations. In this course, we are not focused on a particular field, but are more interested in understanding the methods that political scientists in all fields use to understand and build knowledge. Of course, new things can be both exciting and frightening. Any trepidation that you may have is best overcome by "feeling the fear, and doing it anyway." The excitement will come with the realization that this knowledge is empowering, in that it will enable you to find, read, and understand research on your own. You will also begin to produce this kind of research, which will give you a product of your own labors.

Requirements

In order to meet these goals, participants in the seminar will be required to

- Attend and participate in seminar (10%). Every person should come to seminar prepared to comment on the assigned readings, and help others to understand the concepts presented in the readings and assignments. Research is not a spectator sport, so you should expect me to ask for your contributions on a regular basis. Some time in seminar will be devoted to lecture, but your participation in this course is expected to be that of an "active learner." Any absence from seminar requires a prompt explanation. Multiple absences seriously jeopardize the prospect for successful completion of the course.

- Write occasional assignments (30% cumulative). Some assignments are short essays (roughly 5 pages), and others are exercises using data. Written assignments are announced on this syllabus. Data assignments will be announced in class. All completed assignments must represent each participant's own and sole work, unless otherwise directed.

- Complete an Examination (35%). December 3 during classtime.

- Write a Research Paper (25%). Each participant will be required to submit a research paper. Papers will be judged on readability, the appropriateness of the research question, the suitability of the design for that question, the interpretation of the analysis, and (if appropriate) the feasibility of extending the analysis in an M.A. Thesis or Ph.D. dissertation. Guidelines for the paper are posted here. Due noon Monday, December 8

Readings and Resources

You will also be required to access numerous journal articles, which are generally available electronically through access to E-Learning. If you prefer reading (and paying for) hardcopy, an optional coursepack that contains should be available at Target Copy (1412 W University Ave.). The coursepack is under the course number POS 4734, and it contains many, but not all, of the required readings.

- You will also learn some basic data analysis using SPSS. Students should load this program onto a laptop or tablet (with wireless capability) that they can bring to class when announced. SPSS is available:
  - in the UF Apps package (free, and can be used on a Windows, Mac, or tablet, but can be slow)
  - for lease (to November 30 plus 60 day grace period) from UF Software Services for use on your laptop or home computer ($35 plus tax)
  - for six-month lease from Onthehub for use on your laptop or home computer ($38 + $4.99 download fee)
  - in the Academic Technology labs around campus (free, but you will also need a version on your laptop or tablet that you can bring to class).

- listserv - Registered students in the class are enrolled on the class listserv. Messages from the listserv are sent to students' Gatormail email addresses (e.g., youhoo@ufl.edu), and students should check that email regularly.

- E-Learning - I will also post some materials, assignments, assignment inboxes, and grades on the class E-Learning - Canvas site. Log in at http://lass.at.ufl.edu

The following is a tentative calendar, and dates on assignments are especially subject to revision. Readings marked with an asterisk (*) are included in the Target Copy coursepack.

Researchers as Readers: Literature Review

Read: Johnson and Reynolds, Chapter 3

Followup Assignment Due (Sept 15; 6%) - Write a short literature review that reviews one of the following optional journal articles, at least one journal article which was cited by the selected article, and at least one journal article that cited the selected article. Your review should explain whether the ideas and methods represented in the three (or more) articles are cumulative, and if so, how the ideas (or methods) from later articles were developed from ideas in earlier articles. Your review should close with your thoughts on avenues for future research in the subfield. I expect good papers will be five to seven pages.

Optional journal articles:

Researchers as Theorists: Hypotheses, Concepts, and Variables

Read: Johnson and Reynolds, Chapter 4

Kirkpatrick and Kidd, Chapter 3.

Be prepared to discuss: What are the characteristics of good hypotheses? What is Hall's (1993) unit of analysis?

Followup Assignment Due (Sept 22; 4%): Find an existing dataset somewhere

- in the ICPSR archive (www.icpsr.umich.edu)
- American National Election Study (www.electionstudies.org)
- Quality of Government Institute data (http://www.qog.pol.gu.se/)
- or a publicly available dataset you have found in the readings

Propose two hypotheses that you could test with that dataset. For each hypothesis, tell me
1. The dataset that you are proposing to use
2. The unit of analysis
3. The independent variable(s)
4. The dependent variable(s)

Researchers as Counter: Measurement

Read: Johnson and Reynolds, Chapter 5

Kirkpatrick and Kidd, Chapter 4.

Be prepared to discuss: What are the principal desirable characteristics of social science measures? What is the difference between those characteristics? What measurement issues are important in developing good measures of political knowledge, issue salience, and committee power? Do Hall's measures have desirable characteristics? How do you know, or how could you know?
Followup Assignment Due (Sept 29; 4%): For each of the following variables in the designated datasets, (1) identify the unit of analysis and (2) present appropriate univariate statistics (either frequencies or descriptives) to describe the univariate distribution.

- The Freedom House Political Rights measure (fh_pr) in the Quality of Government basic dataset (http://www.qog.poli.gu.se/data/datasetDownloads/qogbasicdata/)
- The percent of state legislatures that are women (WOMENLEG) in the State Politics and Policy Quarterly dataset (http://academic.uchicago.edu/sppc-TPR/prl_data_sets.html)

Researchers as manipulators: Experiments

Read: Johnson and Reynolds, Chapter 6 (pp. 165 - 193)

Kirkpatrick and Kidd, Chapter 5.

Be prepared to discuss: What are the essential characteristics of an experiment, and what are the basic strengths and weaknesses of an experimental research design as compared to non-experimental designs? Evaluate those strengths and weaknesses with respect to the assigned articles. How is the independent variable manipulated, and how is the dependent variable measured? Is Hall (1992) an experiment? Why or why not?

Followup Assignment (Oct 6; 3%) - Use the King - Matland dataset to replicate their key findings.

Researchers drawing inferences: Observational Designs

Read: Johnson and Reynolds, Chapter 6 (pp. 194 - 221)

Kirkpatrick and Kidd, Chapter 6.

Be prepared to discuss: What are the basic strengths and weaknesses of a quasi-experimental research design and a case-study design as compared to an experimental design? Are Choi et al. (2002), Stratmann and Baur (2002) and Drum et al. (2005) high in internal validity, external validity, neither, or both?

Researchers as lurkers and intruders: Observation

Read: Johnson and Reynolds, Chapter 8

Be prepared to discuss: Are there any advantages or disadvantages to participant observation techniques to gather data? Do these strategies pose any threats to the internal validity of the research design?

Follow-up Assignment Due (Oct 22, 6%): Observe a public meeting. This can be any meeting of a legislature, legislative committee, commission, local board, or any other public agency that you have the right to attend by virtue of your citizenship. Examples of acceptable meetings are the Florida House of Representatives, the U.S. House Committee on Energy and Commerce, the Boynton Beach City Commission, or the Alachua County Recreation and Open Space Advisory Committee. You may, but are not required to, observe a public meeting in your hometown over spring break. The Sunday Gainesville Sun usually lists upcoming public meetings in the City of Gainesville and Alachua County. Examples of unacceptable meetings are Student Government, its committees, other student or UF groups, or neighborhood property owners association meetings.

This website lists public meetings in the City of Gainesville:

This website lists public meetings in Alachua County:
http://www.gosalachua.fl.us/government/boccs/calendar/meetings.aspx

Write a short essay which (a) describes the setting of the meeting, (b) describes your observation role (using a role as defined by one of the readings), and (c) discusses whether the behavior of the meeting's participants varies by some independent variable or variables (e.g., gender, issue type, time). Does your observation of this case tend to confirm a pre-existing theoretical expectation, inform a pre-existing theoretical expectation, and/or help build theory by falsification?

Read: Johnson and Reynolds, Chapter 7

Kirkpatrick and Kidd, Chapter 8.

Be prepared to discuss: When should researchers avoid sampling? Why do researchers have to sample? What kind of samples are used in the assigned articles for this week? Why were these samples chosen? Were these samples appropriate for each sample, what is the theoretical population?

Read: Johnson and Reynolds, Chapter 9

Kirkpatrick and Kidd, Chapter 8.

Be prepared to discuss: What kinds of research designs are employed in this week's readings? Where did the researchers get their data, and are the data and measures appropriate for the questions posed in the articles? Are the research designs stronger in internal validity or external validity, and why?
Followup Assignment Due (November 3; 6%) - Submit a research proposal for your final paper. Your proposal should have an introductory paragraph (or two) stating the research problem that your paper will address, propose at least two hypotheses that will be empirically tested in the paper, identify a dataset that will be used, and identify measures for the independent, dependent, and control variables to be used in the test.

**Researchers as Interrogators: Survey Analysis**

**Nov 5**

He prepared to discuss: What are the challenges in constructing survey instruments posed by the readings? What strategies do the authors propose to address those challenges? Do these strategies aim to improve validity, reliability, sampling, or what?

... Followup Assignment Due (Nov 10; 1%) - Print the survey. (You'll need the Acrobat Reader, if you don't already have it.)

Pick a person to interview by phone (this can be a sample of convenience), and interview the person using this questionnaire. Record the forced choice responses by circling the number of the response. Record the open-ended responses by filling in the blank, or by verbatim transcript of the respondent's answers. Be sure to record the start and end times, and the respondent's first name in the appropriate places on the questionnaire.
